

How would you like to get your dentures fitted in your own home?

"Gentle Care" Dental realises that sometimes you can't get out of the house, but that shouldn't mean that you can't access vital services. That's why we have mobile Prosthetist's who can come to you in your own home and complete the fitting of your dentures.

Our Prosthetist will come to you for your initial consultation. They will then return to complete the moulding and fitting stages and make sure that your dentures are proceeding correctly prior to the final fitting. After your final fitting, we will return to make sure that you are happy with your new denture and all is well.

For more information on how Gentle Care Dental can assist you with your dental needs, please call 604-614-5078 and talk to one of our experienced team
